

SCOTTCHEN

EXACT-SKU ABRASIVE SOURCING

# RFQ SOURCING CATALOG

2026 EDITION

磨料磨具询价采购目录

Abrasive, sanding and polishing accessories for exact-SKU sourcing, sample approval and private-label projects.

## USE THIS AS AN RFQ FRAMEWORK

Not a certificate, test report, fixed-term offer, facility claim or customer case. Exact source, evidence and commercial terms are confirmed in dated project documents.

SALES

[sales@scottchentools.com](mailto:sales@scottchentools.com)

<https://www.scottchentools.com>

Published 2026-07-15 | English-first bilingual buyer guide

Reference product-family image. Exact items, construction and performance must be confirmed by approved sample and dated quotation.

## 01 / BUYING METHOD

# Start with the exact SKU

从准确 SKU 开始

A product family is only the starting point. A sourcing decision needs a locked product definition, a disclosed source record and a project-specific evidence and commercial file.

1

**PRODUCT DEFINITION**

产品定义

Application and work material

Machine, interface and operating conditions

Dimensions, grit, construction and rated use

Target market and packaging format

2

**SOURCE + QUOTE FILE**

来源与报价文件

Contracting entity and source role

Actual facility or outsourced critical process

Approved sample identity and revision

Volume, destination, pack and quote validity

3

**EVIDENCE RELEASE**

证据放行

Requested standard and market

Issuer, document number and validity

Exact covered SKU or sample identity

Label, warning, traceability and change control

**EVIDENCE STATUS AT A GLANCE**

证据状态一览

**PUBLIC**

Brand, website and business email

**PROJECT FILE**

Quote, specification, approved sample and order records

**NOT PUBLIC**

Entity, facility, certificates, reports and client-approved cases

**CONCEPT ONLY**

Clearly labeled AI workflow visuals, never production evidence

Current boundary: no downloadable certificate original, exact-SKU test report or client-approved case is claimed in this catalog. Request and verify each item before relying on it.

## 02 / PRODUCT SCOPE

# Product families, not blanket claims

产品族不是统一承诺

Use these families to organize an inquiry. Every offer still needs an exact construction, sample identity, source disclosure and dated quotation.

01

**BUFFING + POLISHING**

抛光布轮与套装

**RFQ MUST NAME**

Diameter, ply, stitching, bore or interface, compound pairing, work material and operating method.

02

**SANDING SHEETS + DISCS**

砂纸片、砂碟与砂纸卷

**RFQ MUST NAME**

Grain, grit system, backing, coat, bond, hole pattern, dimensions, interface and intended use.

03

**FLAP DISCS**

百叶片

**RFQ MUST NAME**

Diameter, arbor, grit, cloth source, backing, flap geometry, maximum speed, market and label needs.

04

**SANDING BELTS**

砂带

**RFQ MUST NAME**

Length, width, grain, backing, coat, joint type, direction, thickness, machine and tracking conditions.

05

**CUT-OFF + BONDED WHEELS**

切割片与固结磨具

**RFQ MUST NAME**

Dimensions, formulation, reinforcement, arbor, maximum speed, work material, target market and evidence request.

06

**PRIVATE-LABEL KITS**

私牌组合套装

**RFQ MUST NAME**

Full BOM, source of each component, compatibility, count, pack, instructions, warnings, artwork and barcode data.

A family photo, generic specification or previous order does not release a new SKU. Lock the new drawing or specification, approved sample, evidence scope and change-control revision.

# Build a quote that can be verified

制作可核验的报价

Send one line per exact SKU. If a field is unknown, mark it for engineering or buyer confirmation instead of assuming a value.

| FIELD / 字段   | BUYER INPUT / 买家输入                                                      | RELEASE RECORD / 放行记录               |
|--------------|-------------------------------------------------------------------------|-------------------------------------|
| Exact item   | Product family, internal SKU, drawing or reference sample               | Locked identifier + revision        |
| Application  | Work material, process, machine, interface and operating conditions     | Intended-use record                 |
| Geometry     | Dimensions, grit, bore, hole pattern, count and tolerances              | Approved drawing or specification   |
| Construction | Grain, backing, bond, reinforcement, joint and component BOM            | Material and source map             |
| Use + market | Rated use, target country or channel, requested standard and language   | Evidence and label scope            |
| Commercial   | Quantity, cadence, destination, currency, requested Incoterm and timing | Dated quotation                     |
| Packaging    | Pack count, dieline, artwork, warnings, barcode data and carton marks   | Signed artwork + release record     |
| Evidence     | Entity, facility, report, certificate, batch and traceability request   | Original or authorized project file |

DATED QUOTE ONLY

MOQ, sample charge, lead time, payment method and Incoterm are not fixed by this catalog. The applicable values must appear on a dated quote for the exact SKU, volume, destination, packaging and evidence scope.

## 04 / EVIDENCE ROUTES

# Five live due-diligence pages

## 五个买家尽调页面

These pages separate public facts, project records, missing evidence and concept visuals. Open the English URL shown below; add /zh after the domain for the Chinese version.

01

### Evidence Center

证据中心

Status register for entity, facility, certificates, reports, order records and cases.

[www.scottchentools.com/evidence-center](http://www.scottchentools.com/evidence-center)

02

### Product Compliance

产品合规

Product-family fields to lock before an exact-SKU compliance conclusion.

[www.scottchentools.com/product-compliance](http://www.scottchentools.com/product-compliance)

03

### Procurement Terms

采购条款

Commercial inputs, unknowns and dated-quotation controls.

[www.scottchentools.com/procurement-terms](http://www.scottchentools.com/procurement-terms)

04

### Packaging + Private Label

包装与私牌

Dieline, warnings, barcode data, artwork and release workflow.

[www.scottchentools.com/packaging-private-label](http://www.scottchentools.com/packaging-private-label)

05

### Case Evidence Standard

案例证据标准

Minimum fields for a publishable anonymous case; current public status is explicit.

[www.scottchentools.com/case-studies](http://www.scottchentools.com/case-studies)

## EVIDENCE VERIFICATION GATE

## Before you rely on a file

依赖文件前先完成核验

01

### Request the original

or an authorized extract with a verification route.

02

### Match the entity

and the actual facility or source relationship.

03

### Match the exact SKU

sample identity, construction and standard revision.

04

### Check validity

issuer, issue date, expiry and report status.

05

### Control changes

record revision, substitution and reassessment trigger.

**DO NOT INFER**

Icons, marketing copy and generic management-system certificates are not exact-SKU product compliance.

05 / DATED QUOTATION

# Commercial terms that match the project

与项目匹配的商业条款

Terms vary with product construction, quantity, packaging, evidence scope, destination, capacity confirmation and quote date. Use a dated quotation as the controlling commercial record.

| TERM           | DATED QUOTE SHOULD STATE                                            | WHY IT VARIES                                                   |
|----------------|---------------------------------------------------------------------|-----------------------------------------------------------------|
| MOQ            | Quote by exact SKU and pack                                         | Tooling, material lot, artwork, pack-out and source constraints |
| Sample charge  | State unit, tooling, artwork, freight and credit treatment          | Standard sample, custom build and test scope differ             |
| Lead time      | Separate sample, approval, material, production and transit windows | Starts only after the stated approval or payment trigger        |
| Payment        | Name method, currency, milestone, beneficiary and bank-charge rule  | Depends on order value, risk review and contracting entity      |
| Incoterm       | State Incoterms rule, named place and version                       | Destination, freight control and customs responsibility differ  |
| Quote validity | State issue date, expiry, assumptions and change triggers           | Material, freight, exchange rate and scope can change           |

CONTROL SET

**Dated quote + signed specification + approved artwork + contract or PO**

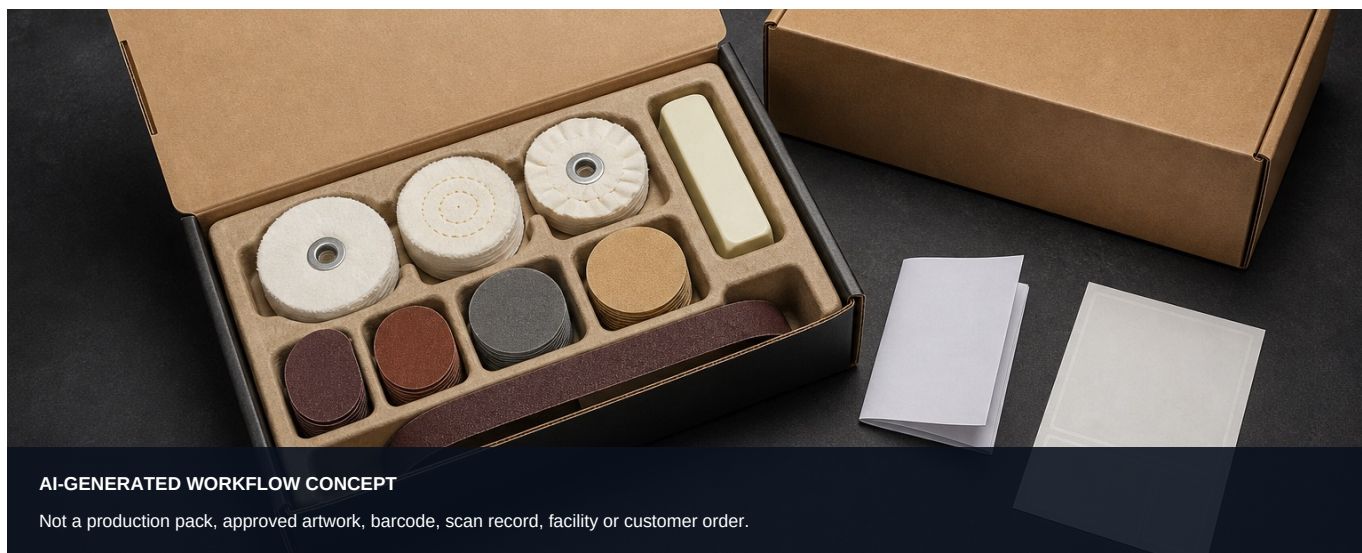

If these records conflict, stop and resolve the revision, scope and authority before payment or release.

## 06 / RELEASE WORKFLOW

# Approve the pack before release

## 放行前批准包装

Packaging is an order-controlled deliverable. Buyer, regulatory, marketplace and supply-chain inputs must be resolved for the exact SKU, pack and destination.

**01 BOM + source map**

Lock every component, count, substitution rule and source role.

**02 Dieline + structure**

Confirm dimensions, material, protection and logistics constraints.

**03 Copy + warnings**

Buyer and qualified advisers approve market, language and use statements.

**04 Barcode data**

Buyer or platform supplies authorized GTIN, UPC, EAN or FNSKU data.

**05 Signed proof**

Approve revision, color reference, placement and responsible signatory.

**06 Pilot + scan plan**

Define how the physical print, scan and platform match will be checked.

**07 Pack-out release**

Record SKU, quantity, carton marks, revision, check result and release authority.

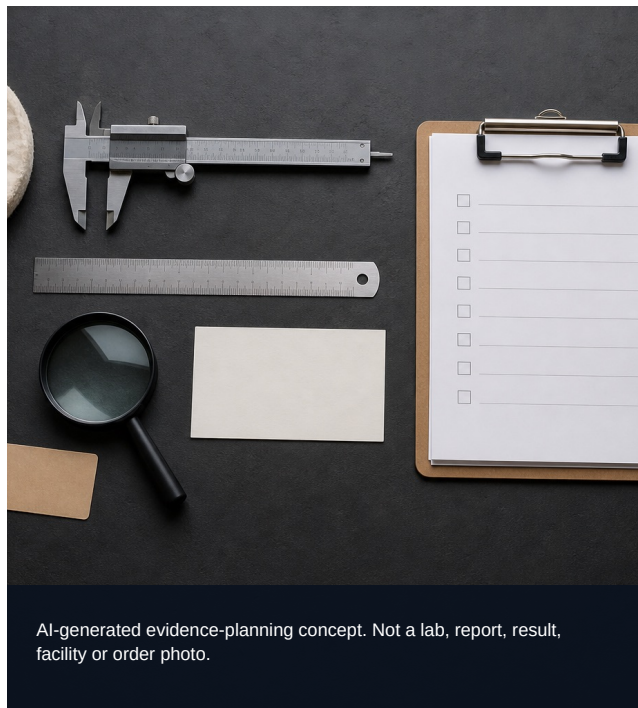

## 07 / HONEST OUTCOMES

# A trial is not a customer case

试样不等于客户案例

No client-approved case evidence is published in this catalog. A capability scenario or internal trial must not be described as a customer project or quantified market result.

**NOT PUBLISHED**

## Minimum case evidence

可公开案例的最小证据

- Country or region and industry
- Exact product or SKU and equipment
- Procurement difficulty and agreed method
- Baseline, test window and sample revision
- Timeline, changes and decision points
- Quantified result with calculation basis
- Client permission and anonymization scope

## SAMPLE-TO-ORDER GATE 从样品到订单的放行链

RFQ

SAMPLE ID

BUYER TEST

REVISION

SIGNED APPROVAL

DATED QUOTE

PO

**PUBLISH ONLY WITH PERMISSION**

If permission or measurable evidence is missing, keep the record private and describe only the RFQ or trial method. Do not invent a country, buyer, result, cycle time or endorsement.

## 08 / NEXT ACTION

# Send a reviewable RFQ

发送可审核的询价资料

The fastest useful response starts with product, application, quantity, destination, packaging and evidence requirements in one reviewable package.

## RFQ attachment checklist

询价附件清单

- ☐ One line per exact SKU or reference sample
- ☐ Application, work material, machine and operating conditions
- ☐ Dimensions, grit, construction, interface and tolerance
- ☐ Estimated quantity, cadence, destination and requested timing
- ☐ Pack count, dieline, artwork, warning and barcode inputs
- ☐ Required entity, facility, certificate, report or batch evidence
- ☐ Requested quote currency, Incoterm and validity window

### DOCUMENT BOUNDARY

## Verify before purchase, payment or market release

This catalog does not state a certification, test result, facility ownership, production location, fixed commercial term, existing barcode scan record or customer outcome. Each item must be confirmed for the exact SKU in dated project documents issued or approved by the responsible party.

本目录用于询价与尽调，不替代准确 SKU 的报价、合同、测试、证书、包装批准或订单记录。
